MISTING FAN 650MM

51Kg, 198cm H × 65cm D

The Masterfan Industrial Misting Fan is a unique economical and efficient fan that cools an area via a fine mist sprayed over its operational zone. Comes with a 3-speed impact motor and 90º oscillation, ensuring the fan has a large square metre influence.

TYPICAL USES:

- Indoor and Outdoor- Great efficient way to cool outdoor and large indoor settings.
- Dust Control- This unit can be used as a dust supression system. Containminants in the air will attached to the water droplets and fall to the ground.
- Warehouse Cooling- Due to its high flow rate and temperature of the water, this unit can be great to cool a warehouse.
- Restaurant Cooling- Great way to cool down customers provided there is enough venitilation to the resturant.
