

POWER BREEZER MISTING FAN

99.8Kg, 176cm H × 67cm W × 94cm D

The compact and durable Power Breezer Misting Fan is an excellent choice for warehousing and construction applications. There are several clients in Australia using them to cool down their workers on very hot days.

TYPICAL USES:

- Indoor and Outdoor- Great efficient way to cool outdoor and large indoor settings.
- Dust Control- This unit can be used as a dust suppression system. Contaminants in the air will attach to the water droplets and fall to the ground.
- Warehouse Cooling- Due to its high flow rate and temperature of the water, this unit can be great to cool a warehouse.
- Restaurant Cooling- Great way to cool down customers provided there is enough ventilation to the restaurant.
